

# Neha Vaghela — Canva-style Modern Resume (Design + Ready-to-Paste Content)

---

## 1) Ready-to-paste resume content (copy each section into Canva text boxes)

### NEHA VAGHELA

*MERN Stack Developer*

Gujarat, India

nehavaghela1221@gmail.com | 9313515443

GitHub · Portfolio (Add links)

---

### PROFILE SUMMARY

Motivated MERN Stack Developer with hands-on experience building responsive web applications and WordPress websites. Strong foundation in JavaScript, React, Node.js, and MongoDB. Passionate about clean UI, scalable architecture, and delivering real-world solutions.

---

### SKILLS

**Front-end:** HTML5, CSS3, JavaScript, React, Bootstrap, jQuery

**Back-end:** Node.js, Express.js, MongoDB (Atlas)

**Tools:** Git, GitHub, Netlify, Postman

**Languages:** C, C++, Python

---

### WORK EXPERIENCE

#### WordPress Developer Intern — Applen Solution

*Feb 2024 – May 2024*

- Customized WordPress themes & plugins to improve UI/UX.
- Built responsive websites using HTML, CSS, and JavaScript.
- Improved website performance and cross-device compatibility.

#### MERN Stack Developer Trainee — TOPS Technologies

*Jun 2023 – Feb 2025*

- Trained in React, Node.js, Express.js, and MongoDB.
  - Built & deployed full-stack applications using MongoDB Atlas.
  - Developed REST APIs and front-end interfaces.
-

## PROJECTS

**Restaurant Management Website (MERN)** — Login, service management, dynamic menus. (React, Node.js, MongoDB)

**QR-Based Feedback System (PHP + MySQL)** — QR-scannable feedback with scalable backend and efficient retrieval.

**SkillVibe — Portfolio Builder** — Customizable templates, real-time preview, responsive UI.

**Travel Story Platform (MERN)** — Share, like, save, and search travel stories with filters.

---

## EDUCATION

**B.Tech, Information Technology** — Silver Oak University (CGPA: 9.64) | 2021 – 2025

Rosary High School | 2019 – 2021

St. Joseph School | 2017 – 2019

---

## CERTIFICATIONS

- Postman API Fundamentals
  - Google Cloud — Security & Operations
  - Software/Product Developer Certificate
- 

## 2) Canva Design Instructions (two-column modern layout)

**Canvas setup** - Document size: A4 (210 × 297 mm) or US Letter (8.5 × 11 in) depending on preference.

- Margin: 18–24 px (or 12–18 mm) all around.

**Grid / Layout** - Create a two-column grid: Left column 32–36% width (sidebar), Right column 64–68% width (main content).

- Add 24–30 px gutter between columns.

**Colors (subtle, professional)** - Accent / Sidebar: #0EA5A4 (teal) OR #2563EB (soft blue) — choose one.

- Headings (dark): #0F172A (slate/near-black).
- Body text: #374151 (gray-700).
- Background: White #FFFFFF.

**Typography** - Name: Montserrat ExtraBold or Poppins ExtraBold, 20–24 pt.

- Job Title: Montserrat SemiBold or Poppins Medium, 12–14 pt, uppercase or small-caps.

- Headings (Experience, Projects, Education): Inter / Lato / Roboto Slab, 10–12 pt, bold.

- Body text: Inter / Lato / Roboto, 9–11 pt, line-height 1.35–1.5.

- Elements: Left Sidebar**
1. Draw a vertical rectangle that covers the full height of the resume on the left column. Fill with the accent color but keep opacity around 95–100% for clean contrast.
  2. At the top of the sidebar, place your name (white text if using colored sidebar) and job title underneath in lighter weight.
  3. Below, add an icon row for contact details (email, phone, location). Use small circular icon placeholders (20–24 px).
  4. Add a "Skills" block with horizontal dividers. Use small dot or pill bullets. Keep spacing tight.
  5. Add a small "Certifications" list at the bottom of the sidebar.

- Elements: Right/Main Column**
1. Add a short Profile Summary at the top.
  2. Use section headers for Experience, Projects, Education.
  3. For each job, create a compact card: Job Title (bold) — Company (regular) — Date (muted on right). Beneath, add 3–4 bullet points.
  4. For Projects, use 1–2 line descriptions and include tech stack in italics.
  5. Use subtle dividers between sections (1 px, very light gray `#E6E9EE`).

- Icons & Visuals** - Use simple line icons (Canva's icon set) for Email, Phone, Location, GitHub, Portfolio.  
 - Avoid photos — keep it professional and minimal.

- Spacing & Visual Rhythm** - Use consistent vertical spacing: 8–10 px between small items, 14–18 px between groups/sections.  
 - Align text to a 12 px baseline grid for neatness.

- Accessibility & ATS notes** - Keep a plaintext version of the resume somewhere in your files (simple Word / PDF without colored sidebar) for ATS submission.  
 - When exporting for ATS: export as a standard PDF (not image-based), remove icons from the left sidebar if the ATS system strips text, and keep a plain text copy as a fallback.

- Export** - For applications: Export as PDF — "High quality" (PDF standard).  
 - For sharing on portfolio: Export PDF + PNG for social preview if needed.

### 3) Quick Canva build steps

1. Open Canva → Create a design → Custom size (A4).
2. Add a two-column grid from Elements → Grids → choose a split layout or create rectangles manually.
3. Add the sidebar rectangle and set the accent color.
4. Add text boxes for Name, Title, Contact, Skills (paste the text from Section 1).
5. On the right column, add text boxes and paste Profile, Experience, Projects, Education.
6. Insert icons next to contact info from Elements → Icons.
7. Tune typography sizes and spacing to match the recommendations above.
8. Download → PDF Print (for best quality) or PDF Standard (smaller file) depending on requirement.

### 4) Variants & Tips (Optional)

- **Variant A (Colored Sidebar):** Use teal (`#0EA5A4`) sidebar with white text. Good for portfolios and LinkedIn uploads.

- **Variant B (Minimal Black & White):** Remove the colored sidebar; replace with thin left column border. Works best for strict ATS environments.
  - **Variant C (Professional Blue):** Use `#2563EB` for a conservative, corporate look.
- 

## 5) Need this done for you?

I can:

- Create and export the Canva file for you (upload-ready).
- Provide 2 color variants and an ATS-friendly plain PDF.

Tell me which option you want: **(1) I'll create and export the Canva file, (2) I'll create color variants, or (3) Just the ATS plain PDF.**
